

Special Needs Life: An Overview from Cradle to Grave

Early Intervention Programme – Autism (EIP) is proud to embrace the opportunity to host a special needs education seminar entitled '**Special Needs Life: An Overview from Cradle to Grave**'.

EIP provides professional services within a multidisciplinary setting under one roof. We specialize in providing individualized educational programmes and learning support to children with autism (ASD) and other special educational needs (SEN). Our team consists of a board certified behaviour analyst (BCBA), special needs educator, educational psychologist, speech therapist, occupational therapist and teachers. Our mission is to continuously strive as a premier centre to develop and uphold evidence-based approaches and data driven programmes to improve the lives of children with autism and special educational needs.

Over the years, we realise that there is a need not just to address the intervention and education needs of the SEN but also to equip their families and the next generation caregivers with the necessary knowledge and information to care for individuals with SEN.

The goal of the Cradle to Grave seminar is to provide a comprehensive, informative and educational event to highlight issues across the lifespan of individuals with special needs such as Autism Spectrum Disorder, ADHD and other learning difficulties. As shown above, it is an extensive seminar that will cover all aspects of an individual's life.

Who should attend:

- Parents and other primary or secondary caregivers including siblings, grandparents, immediate family and etc.
- Special Educational Needs professionals including psychologists, therapists and teachers.
- Students pursuing psychology, special education, early childhood education and other related fields of study.
